**The Sensepoint XCD range provides comprehensive monitoring of flammable, toxic and Oxygen gas hazards in potentially explosive atmospheres, both indoors and outdoors. Users can modify detector operation using the LCD and magnet switches without ever needing to open the unit. This enables one-man, non-intrusive operation and reduces routine maintenance time and costs.**

A tri-colour backlit LCD clearly indicates the unit's status at a glance, even from a distance. A steady green backlight indicates normal operation, flashing yellow indicates fault and flashing red indicates an alarm.

All detectors are supplied pre-configured and include 2 programmable alarm relays, 1 programmable fault relay as well as an industry standard 4-20mA output (sink or source selectable) and MODBUS\*.

The scale, range, relay operation, alarm set point and electronic tag number of the detector can be adjusted using the transmitter's LCD and non-intrusive magnetic switches. Outputs are automatically inhibited during adjustment, thereby reducing the risk of false alarm at the control panel during maintenance.

Sensepoint XCD has an integral mounting plate for surface mounting or can be mounted to a horizontal or vertical pipe using the optional pipe mounting bracket. Electrical installation can be made using either conduit or cable with suitable mechanical protection. Two M20 or ¾"NPT entries are provided (depending on certification). A weatherproof cap is also included for use in the harshest outdoor conditions. Other optional accessories include a sunshade/deluge protection, duct mounting kit, collecting cone and remote mounting sensor socket\*.

Sensepoint XCD ensures easy installation and the fastest routine operation by removing the need for hot work permits in hazardous areas. Using easy to replace plug-in sensors, downtime is also reduced and on-going costs are minimised through the use of poison resistant flammable sensors, poison immune infrared Hydrocarbon sensors and patented Surecell™ toxic sensors.

## Typical Applications

# Sensepoint XCD Overview

There are three different types of the XCD transmitter for use with three different families of sensors.

The mV type transmitter is for use with the mV family of XCD sensors including catalytic sensors to detect flammable gases in the range 0-100%LEL and infrared (IR) sensors for detection of Hydrocarbon gases in the range 0-100%LEL and 0-100%Vol\*, as well as Carbon Dioxide (CO<sub>2</sub>) in the range 0-2%Vol.

The EC type transmitter is for use with the EC family of XCD sensors including Carbon Monoxide (CO), Hydrogen Sulphide (H<sub>2</sub>S) and Hydrogen (H<sub>2</sub>).

The Oxygen transmitter is for use with the Oxygen (O<sub>2</sub>) XCD sensors.

A transmitter can auto-recognise any sensor from within its sensor family. The sensor simply plugs into the bottom of the transmitter and the transmitter automatically configures itself accordingly.

Sensepoint XCD Sensor Families, Gases and Ranges							
		Gas	User Selectable Full Scale Range	Default Range	Steps	Selectable Cal Gas Range	Default Cal Point
Sensor Family	mV	Catalytic Bead Sensors				30 to 70% of selected full scale range	
		Flammable 1 to 8*	20 to 100%LEL	100%LEL	10%LEL		50%LEL
		Infrared Sensors					
		Methane	20 to 100%LEL	100%LEL	10%LEL		50%LEL
		Methane	20 to 100%Vol.*	100%Vol.	10%Vol.		50%Vol.
	Carbon Dioxide	2.00%Vol. only	2.00%Vol.	n/a	1.00%Vol.		
	EC	Electrochemical Sensors					
		Hydrogen Sulphide	10.0 to 100.0ppm	50.0ppm	0.1ppm	25ppm	
		Carbon Monoxide	100 to 1,000ppm	300ppm	100ppm	100ppm	
		Hydrogen	1,000ppm only	1,000ppm	n/a	500ppm	
		O <sub>2</sub>	Oxygen	25.0%Vol. only	25.0%Vol.	n/a	20.9%Vol. (Fixed)

## Ready, Steady, Go!

Sensepoint XCD uses three instantly recognisable 'traffic light' colours to indicate its status. The large tri-colour backlit LCD is steady green to indicate normal operation, flashes yellow to indicate a fault/warning and flashes red to indicate an alarm. This allows anyone in the area to clearly see at a glance the status of any detector. This can be particularly useful to identify detector status if the detector is located in a difficult to access area or if a number of detectors are located in the same area.

# Installation

## Outline Installation Dimensions

The Sensepoint XCD transmitter has an integral mounting plate consisting of four mounting holes on the transmitter body. The transmitter may be fixed directly to a surface mounting, or to a horizontal or vertical pipe/structure, 40.0-80.0mm (1.6 to 3.1") in diameter/cross section. The pipe mounting bracket accessory (optional) may be used for this purpose.

User cable entries shown (2 x M20) are for ATEX/IECEx version enclosures. UL/c-UL versions have 2 x ¾"NPT conduit entries. A suitable blanking plug is supplied which must be used to seal any unused entry. The blanking plug must be suitably sealed to maintain the IP rating of the detector.

All dimensions in mm.  
1" = 25.4mm

# Installation

## Electrical

Sensepoint XCD is designed for use in potentially explosive atmospheres. As such, installation should follow national guidelines using suitable mechanically protected cable and glands or conduit. Use 0.5mm<sup>2</sup> (20AWG) to 2.5mm<sup>2</sup> (~13AWG) cross sectional area cable as needed to ensure minimum operating voltage at the detector, depending on installed cable length. Cable diameter should be selected to maintain the minimum required voltage for the longest installed cable length under maximum power.

## Wiring Schematics

The Sensepoint XCD transmitter may be wired in either Current Sink or Current Source configuration. These two options are offered to allow greater flexibility in the type of control system that it can be used with. Sink/Source is selectable via the switch located on the back side of the display module; accessible by removing the display module during installation/commissioning.

- Duct Mount Kit
- Weather Protection
- Flow Housing

## FEATURES & BENEFITS

- Choose from a range of mA or Modbus output versions for flexible system design to meet the customers requirements.
- Selectable source or sink current for analog output enables one detector to be suitable for both system configurations.
- The ingress protection of NEMA 4X/IP66 allows units to be installed in outdoor environments.
- Simplified maintenance with familiar smartphone technology saves money and time.
- Multi-color visual indicator to show status makes it easier to know the detector status immediately and identify detectors that require attention or are warning of danger.
- Manage the detector without making a physical connection. Remove the need for physical access to hard-to-reach devices.
- One person calibration without the need to open the detector. Saves time and removes need for hot work permit.
