# Electric Fire Pump Controller Feature

## Fire Pump Combine Pack @ FPCP

### Compact Package

The FPCP provides a method of packaging multiple types of controllers in a single casing, reducing wiring and installation costs in addition to capitalising space utilization. This option provides total flexibility in powering the individual units within the FPCP enclosure. The combination of a main disconnect switch and horizontal busbar can power up the entire line-up of controllers. This eliminates the need to feed each controller with its own individual power source.

### Efficient Space Utilization

Various types of controllers can be integrated into the FPCP design. This includes Electric, Diesel, Transfer Switch and Limited Service controllers.

Foot print can be saved by vertically stacking two controllers in the same structure. This design can save over 50% of the floor space comparing to installing two conventional controllers.

### Reduced Wiring Costs

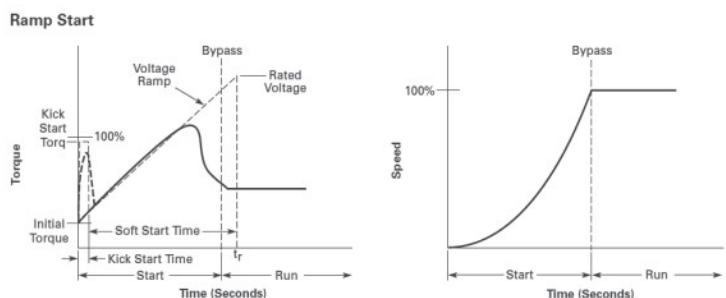

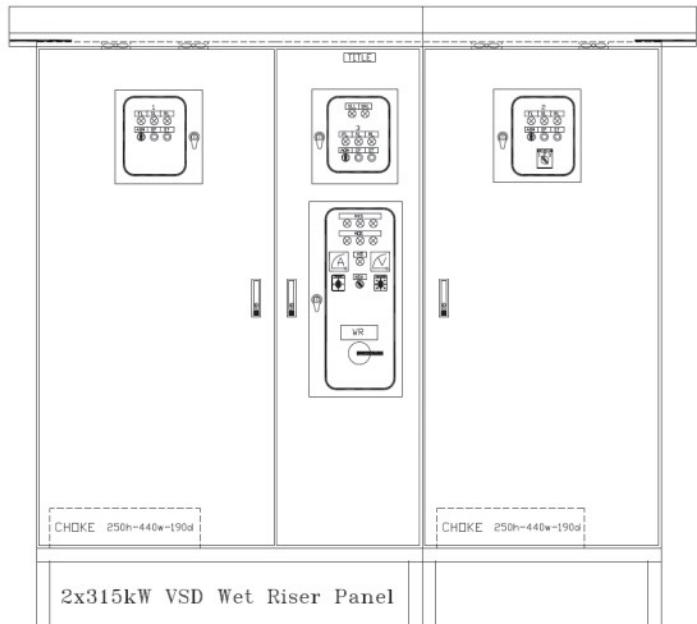

The FPCP uses horizontal and vertical bus bars to distribute power to individual controller compartments. Due to this, the amount of materials and wiring is reduced significantly.

### Installation Savings

This costs are reduced. Electrical installation cost of materials and installation time are reduced which results in an overall cost savings.

This design allows for a single power source to be connected to the controller and then subsequently distributed throughout the controller to each individual cell.

## Products & Services:

- Main Low Voltage Switchboard
- Motor Control Central Panels
- Industrial Outdoor Panels
- ACMV Control Panels
- Instrumentation Control Panels
- Pumping Station Motor Control Panel
- EMC racks
- Customised main consoles

## Industries served:

Trident serves a wide range variety of industries and committed to giving the best products and services.

## Key Capabilities:

- Customisation
- Quick turnaround
- Installation of ELV Ctrl Monitoring Sys
- Installation works of BAS/BMS Ctrl Monitoring Sys.
- Secondary cable installation
- Type Tested LV Switchboard
